About This Game

With FPH SpedV, you will enjoy your Trucking Simulators more! It allows users to create, manage or join virtual Trucking Companies.

You can drive Tasks, settle them to get money, set how much expenses or salary you want to pay your employees, buy and manage trucks in branches, ...

The recording of the trips is very simple and automatic, cause we are using the supplied "Telemetry". Also, by the voice output of SpedV, special events useful for using SpedV will be announced (requires languagepack or Windows 10)

In SpedV itself, it is up to each user how he or she handles it virtual trucking company, whether it's an increased salary for the managing director, bonuses for driving tours, setting a destination for the company, attracting drivers with a percentage profit distribution.

Also, driven orders can be viewed in retrospective, special statistics retrieved or the rank of your expedition over all registered expeditions can be viewed.

There is much to discover, and yet to come, but we (the SpedV team) welcomes anyone who uses our software - and we help you via TeamSpeak, Discord or our Ticketsystem, if you need help.
